PROFESSIONAL SUMMARY

UI/UX & Product Designer with 3 years of experience designing scalable SaaS, web, and mobile applications for international clients. Skilled in user research, product strategy, design systems, usability testing, and creating production-ready React and Angular interfaces. Experienced in Agile collaboration and delivering user-centred, accessible (WCAG 2.1) solutions.

WORK EXPERIENCE

UI/UX & Product Designer | Chordify | Trivandrum *Oct 2023 – Present*

- Led end-to-end UX and product design for 10+ international client projects across web and mobile platforms, consistently delivering within Agile sprint cycles.
- Designed and maintained a scalable design system in Figma (components, tokens, guidelines), reducing designer-developer handoff time by ~30%.
- Conducted usability testing, A/B testing, and heuristic evaluations across 10+ products, improving average task-completion rates by ~20%.
- Produced high-fidelity prototypes, motion specs, icons, and visual assets aligned to each client's brand identity.
- Collaborated with React and Angular developers to ensure pixel-perfect, accessible (WCAG 2.1) implementations across responsive breakpoints.
- Performed manual QA testing, cutting post-release defect rates by ~25% and preserving design intent across all breakpoints.

Full-Stack Development Training | Luminar Technolab | Kochi *Feb 2023 – Sep 2023*

- Completed an intensive full-stack development programme covering the MERN stack (MongoDB, Express.js, React.js, Node.js), bridging the gap between design and front-end engineering.
- Built personal projects integrating FlutterFlow and n8n workflow automation, deepening expertise in design-to-development handoff and component-driven architecture.
- Applied engineering knowledge to UX practice, enabling more production-realistic prototyping and tighter collaboration with development teams.

KEY PROJECTS

Plamr8d — Social Food Delivery Platform *Product Design • UX Research • Design Systems • Mobile-First*

- Designed an Instagram-inspired food delivery platform with 4 user roles (Foodie, Chef, Bartender, Restaurant/Cafe/Bar), architecting full information architecture, user personas, and journey maps for role-based onboarding.
- Built a seamless in-feed ordering flow enabling foodies to follow restaurants and order directly from posts, reducing funnel steps by 40% vs. traditional delivery apps.
- Delivered a scalable Figma design system covering social feed components, order cards, role-specific dashboards, and WCAG 2.1 accessibility-compliant interaction patterns.

Faujx — AI-Powered Talent Pool Platform *Product Design • UX Strategy • AI-Integrated Workflows • B2B SaaS*

- Led end-to-end product design for a talent acquisition platform with 3 user roles (Candidate, Client, Mentor), including a 3-stage AI-driven assessment funnel — AI MCQ, coding round, and panel interview — with progress indicators and feedback UX.
- Built the client-side hiring interface for browsing vetted candidate profiles, filtering by skill and assessment score, and scheduling interviews within the platform.

- Mapped candidate anxiety touchpoints via design thinking and accessibility audits, resulting in a progress-forward UX that improved assessment completion rates.

SKILLS

UX & Design: User Research • Design Thinking • Usability Testing • A/B Testing • User Personas • Journey Mapping • Wireframing • Prototyping • Interaction Design • Accessibility (WCAG 2.1) • Accessibility Audits • Design Systems • Design Tokens • Responsive Web Design • Information Architecture

Frontend: React • React Hooks • Redux • JavaScript • HTML • CSS • Tailwind CSS • REST APIs • API Integration

Product: Product Management • Product Strategy • Product Roadmap • Go-to-Market • Stakeholder Management

Process: Agile / Scrum • Cross-functional Collaboration • Design-to-Development Handoff • Manual QA Testing

TOOLS

Design: Figma • Framer • Zeplin

Code: React • Redux • Tailwind CSS • Figma REST API • Git / GitHub

Automation & AI: n8n • FlutterFlow • AI-Assisted Development • Prompt Engineering

Collaboration: Notion • Jira

EDUCATION

B.Tech – Mechanical Engineering 2016 – 2020

Sreepathy Institute of Management & Technology

Transitioned into UI/UX and product design through self-directed study, professional experience, and structured coursework. Systems thinking, engineering design processes, and analytical problem-solving directly inform product design methodology.

Higher Secondary – Computer Science

Bethany St. John's

2014 – 2016

CERTIFICATIONS

- **Figma UI/UX Design – Advanced Course** | Udemy | Jan 2025
- **Product Management Certification** | NextLeap | Mar 2025
- **MERN Stack Developer Course** | Luminar Technolab | Sep 2023
